

Coharts Seed: Investor Intro List

Prepared for Johnny to coordinate warm introductions · October 2026 · DLA has the email addresses

Coharts in one line: An Applied AI company: the intelligence layer between a molecule and a medicine. **Foresight** is AI-native, IaaS drug-development infrastructure that connects raw assay to regulatory submission and simulates trial success before patient one. Automated ICH E6(R3) governance and ICH M15 model credibility are built in as the regulatory moat, not the pitch. Validated retrospectively (NSCLC in proof of concept); Tempus POC, Synthon pilot, and a Lilly CDA live. Raising a seed.

Radical Ventures is intentionally excluded (portfolio conflict).
