

Coharts Seed: VC Shortlist for DLA

Jennacap.ai-sourced list, reviewed and scored · October 2026 · DLA has the email addresses

Coharts in one line: An Applied AI company: the intelligence layer between a molecule and a medicine. **Foresight** is AI-native, IaaS drug-development infrastructure that connects raw assay to regulatory submission and simulates trial success before patient one. Automated ICH E6(R3) governance and ICH M15 model credibility are built in as the regulatory moat, not the pitch. Validated retrospectively (NSCLC in proof of concept); Tempus POC, Synthon pilot, and a Lilly CDA live. Raising a seed.

Pursue — Tier A LEAD-CAPABLE, ON THESIS

FIRM	CONTACT	TITLE	WHY IT FITS	FIT
Artis Ventures (AV)	Austin Walne / Stuart Peterson	Partner (co-leads TechBio) / Managing GP	TechBio-native, \$200M fund, leads health-AI rounds	82
2048 Ventures	Alex Iskold	Founder & General Partner	Fresh \$82M fund (Jan 2026); Vertical AI + Health + Bio; leads seed	82
Modi Ventures	Sahir Ali, PhD	Founder & General Partner	\$88M fund (2025); AI x biology "biostack" thesis	78
Lux Capital	Deena Shakir	General Partner	Already on the DLA list (route via Jonathan Axelrad)	80

Pursue — Tier B ON THESIS

FIRM	CONTACT	TITLE	WHY IT FITS	FIT
First Star Ventures	Millie Liu	Founder & Managing Partner	"Computing x real-world" incl. computational biotech; infra-leaning	68
1984 Ventures	Confirm partner	—	Vertical AI + dev-infra + software that expands clinical capacity	68
Coho DeepTech	Elvis Zhang / Jennifer Zhai	Founder / Partner	AI + bio/health early-stage, high conviction	66
Starbloom Capital	James Fickel	Founder & Managing Director	AI + bio; leads seed (\$250K-\$5M)	66
Asset Management Ventures	Skip Fleshman / Lou Lange	Partner	Digital health + life sciences seed/A	60

Selective / strategic LOWER PRIORITY

FIRM	CONTACT	TITLE	NOTE	FIT
Qiming Venture Partners USA	Isaac Ciechanover, MD	US Partner	Healthcare fund, therapeutics-weighted; only via the healthtech-tools angle	52

Lilly Ventures	Confirm partner	—	Strategic CVC + potential customer (not "Lilly Research Laboratories", which is R&D)	64
-----------------------	-----------------	---	--	-----------

Skip — off-thesis **DO NOT SPEND INTRO CAPITAL**

FIRM	WHY SKIP
SiteBridge Research	Not a VC (clinical-site research org) — a potential customer, not a funder
Neovate, Epidarex, Criteria Bio, Lifespan Vision, Perceptive Xontogeny, Abingworth	Pure therapeutics / medtech funds — they back drug and device developers, not software
NYSERDA, 3M Ventures, At One Ventures	Off-thesis: cleantech / government, industrial, and climate-hardware mandates
Mubadala Capital	Series B+ / \$10-50M checks — stage mismatch for a \$6M seed
Duke Capital Partners	Gated to Duke-affiliated startups
Amasia, Zone 2 Ventures	Amasia is a climate/sustainability software fund; Zone 2 is a new, very small fund

Fit score out of 100 (six-dimension rubric). Warm-path scored cold: Jennacap.ai supplied the list, not brokered intros — if DLA opens any firm, the score is bumped. Full evidence, sources, and scores live in [coharts-seed-investor-pipeline.xlsx](#).
